

Stone Chips & Boulder Supply

A boulder is a rock fragment with size greater than 25.6 centimeters (10.1 in) in diameter. Smaller pieces are called cobbles and pebbles, depending on their "grain size". While a boulder may be small enough to move or roll manually, others are extremely massive. In common usage, a boulder is too large for a person to move. Smaller boulders are usually just called rocks or stones.

One of the most crucial elements in the construction work is the boulder concrete or crushed stone. The boulder concrete is used for making Housing/industrial structures, roadways and other more.

We supply high quality of stone aggregates like stone chips, stone boulders of various sizes used in the construction industry, Our stones are very superior in terms of compressive strength, specific gravity & are SGS approved. We can supply bulk quantities from UAE, India, Malaysia & Vietnam as per clients requirement.
